ONETOUCH™ 9420 USB

Scanner with Slide & Negative Adapter

- Create a DVD SlideShow
- Convert photos and documents to digital files
- Restore images with included photo restoration software

48-bit Color • 4800 x 9600 dpi • USB 2.0 Hi-Speed Interface • Win 2000/Me/XP

Visioneer wrote the book on ease-of-use. Our revolutionary OneTouch technology simplifies the way people use a scanner. The OneTouch buttons are pre-configured for common scanning tasks so you get great results within minutes of opening the box. Button settings can be customized to unleash even more power for advanced users. The Visioneer OneTouch 9420 USB is blazing fast. The Hi-Speed USB logo is your assurance that the OneTouch 9420 USB transfers data to your computer up to 40 times faster than a USB 1.1 scanner yet the OneTouch 9420 is fully compatible with all USB ports including USB 1.1.

Software

ScanSoft PaperPort

The world's best-selling document and image management application creates thumbnails of everything you scan allowing easy filing in color-coded folders. ScanSoft's TextBridge Optical Character Recognition engine is built-in to PaperPort so you can easily use the scanner's OCR button to scan printed text directly into your word processor where it is fully editable.

ArcSoft DVD SlideShow and PhotoImpression

ArcSoft softwares offer the perfect combination of power and simplicity so you can do more with your photos. From quick corrections to creative editing, you can easily achieve high quality results. Whether you scan traditional photos, slides or negatives, DVD SlideShow and PhotoImpression make digital imaging a breeze.

Features and Benefits

Superb Image Quality

48-bit internal color capability recognizes over 281 trillion colors. 48-bit scanners capture more detail in the shadow and highlight areas of an image than their 42-bit predecessors, so you'll get brighter yellows, richer reds, cooler blues, and everything between.

High Resolution

4800 x 9600 dpi optical resolution eliminates jagged edges and captures the finest detail from your original.

Powerful Scanning of 35mm Slides and Negatives

The Visioneer OneTouch 9420 USB includes a built-in backlight and film holder for scanning 35mm slides and negatives. Archive old photos from negatives for higher quality.

Easy to Use

Just press a OneTouch button to scan and send an image to the destination of your choice. While intelligent default button settings give perfect results on common scanning tasks, the OneTouch preferences utility makes it simple to customize the buttons.

ONETOUCH™ 9420 USB

Scanner with Slide & Negative Adapter

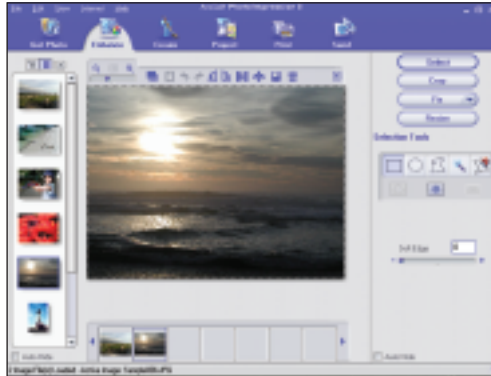

Powerful Software

The OneTouch 9420 USB comes with all the software you need to scan, edit, create and share a huge assortment of projects. ScanSoft PaperPort let's you easily manage your documents and images. PaperPort's built-in TextBridge OCR engine converts scanned text into editable documents. ArcSoft DVD SlideShow and PhotImpression softwares allow you to edit your images and turn them into stunning visuals for sharing by print, web or email.

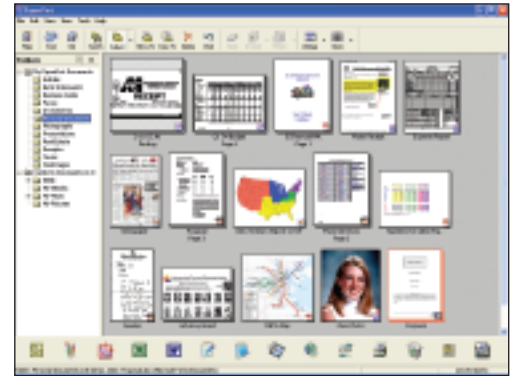

- 48-bit Color
- 4800 x 9600 dpi
- USB 2.0 Hi-Speed Interface
- Win 2000/Me/XP

With ArcSoft DVD SlideShow you can quickly and easily produce professional-looking DVD movie discs featuring your scanned photo prints, digital photos and home videos.

PhotImpression™ is an easy-to-use photo editing and creative design program that allows you to edit and retouch your photos, then add special effects or place them in cards, calendars, frames and templates. PhotImpression also includes a wide variety of printing options for single or multiple photos, including the ability to print entire albums of thumbnail images.

PaperPort automatically links to many popular applications. Just drag and drop a scanned image or document on the link of your choice to launch the application and put your images to work. PaperPort even links to your printers and to most email and fax applications.
